

# Modular Air Handling Unit

## IMAGINE ...

- Modular construction
- Fast Delivery
- Competitive Pricing
- Robust Design
- Full time commissioning and support staff ready to serve you

## PRODUCT FEATURES:

- ✓ Modular Construction- The Air Nodin Modular Air Handlers are designed to provide custom and standard Air Handler designs that enable flexible construction, reduced lead times and the ability to be constructed on site if required.
- ✓ Fast Delivery- Our modular design enables us to produce air handlers very quickly, reducing lead time for delivery.
- ✓ Competitive Pricing- Air Nodin is able to meet or exceed your pricing requirements in almost every case. Our unique production methodologies provides for efficient construction processes that enables us to offer very competitive pricing.
- ✓ Robust Design- Our use of steel framing makes for a very robust unit that is designed to stand up to very difficult shipping and installation demands.
- ✓ Full time commissioning and support; Air Nodin maintains staffing to rapidly respond to customer needs at the initial installation and commissioning stage, as well as to perform long term support of the units to keep your system operating.

Air Nodin strives to control its own supply chain to ensure rapid delivery and the lowest cost possible for Air Handlers and support requirements. We maintain a fully equipped factory to manufacture most of our own component parts and have a strategy of buying local as much as possible to avoid fluctuations in pricing and delivery.

At Air Nodin, we take our Air Handlers and our customers very seriously.
